You've been redirected from the Postman Desktop App on win32 10.0.22621 to create an account.

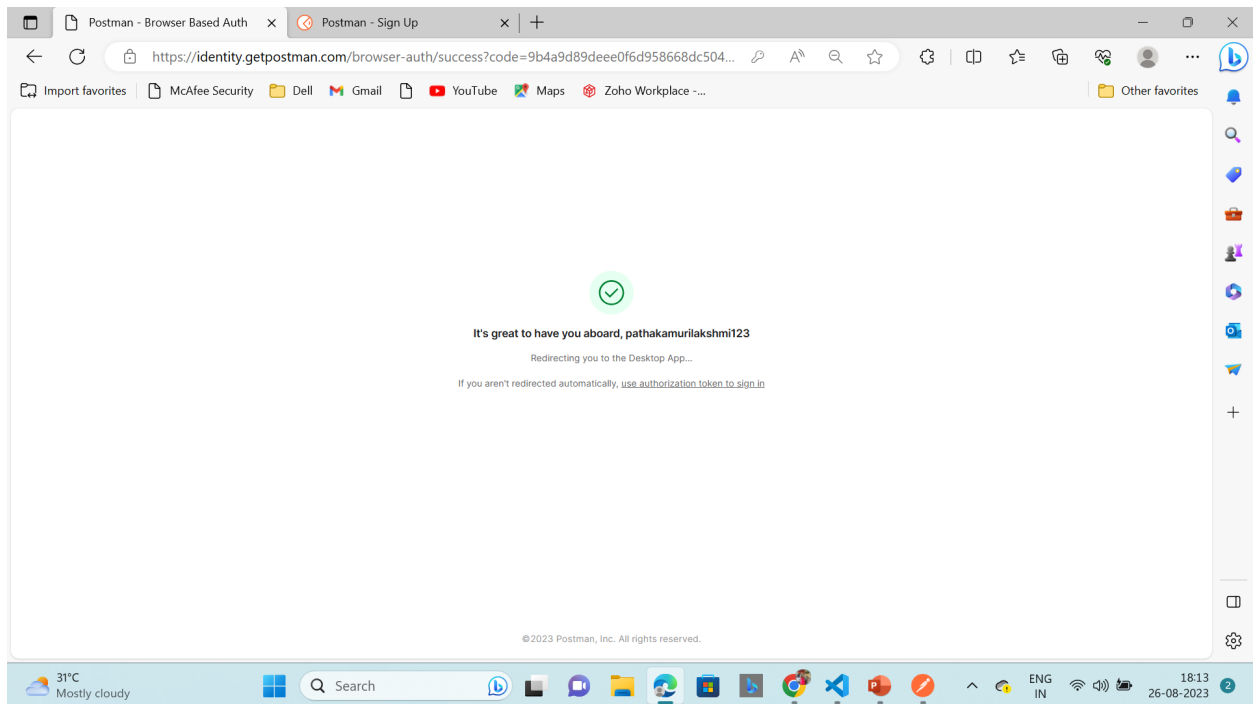

Step 4:

After Successful Account Creation You Will get this

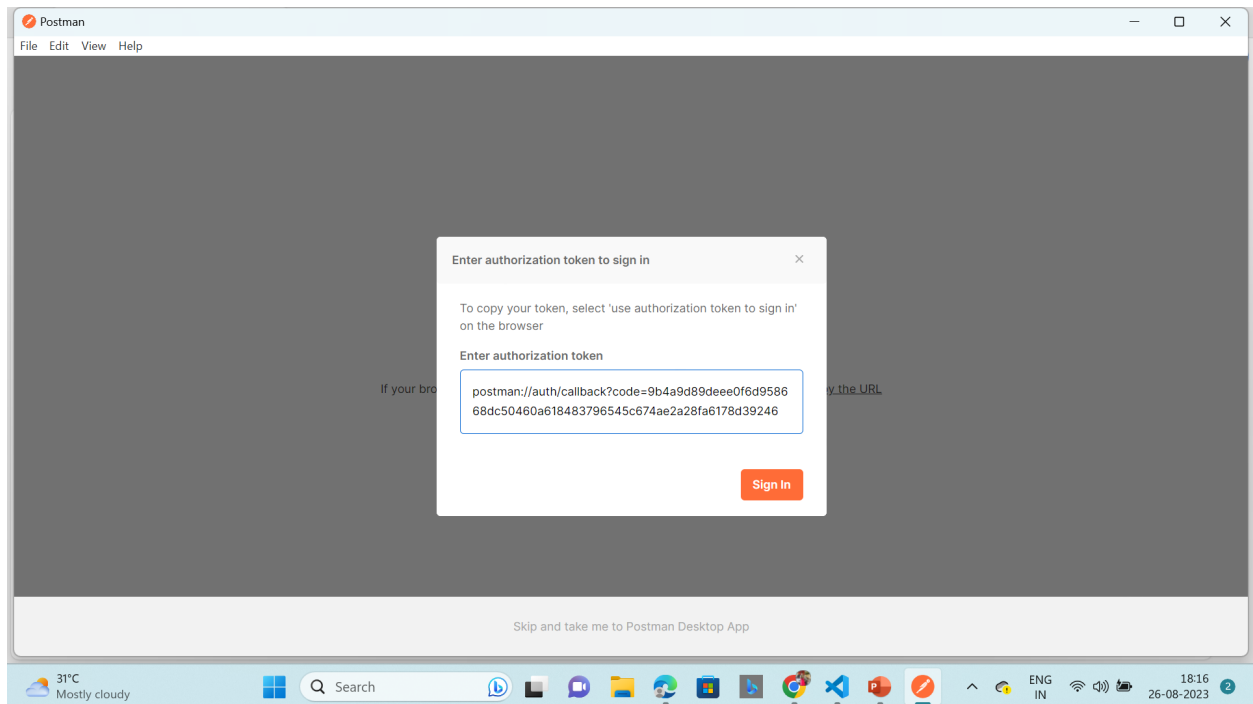

Step 5:

Now You Will get Authorization Token to Sign In

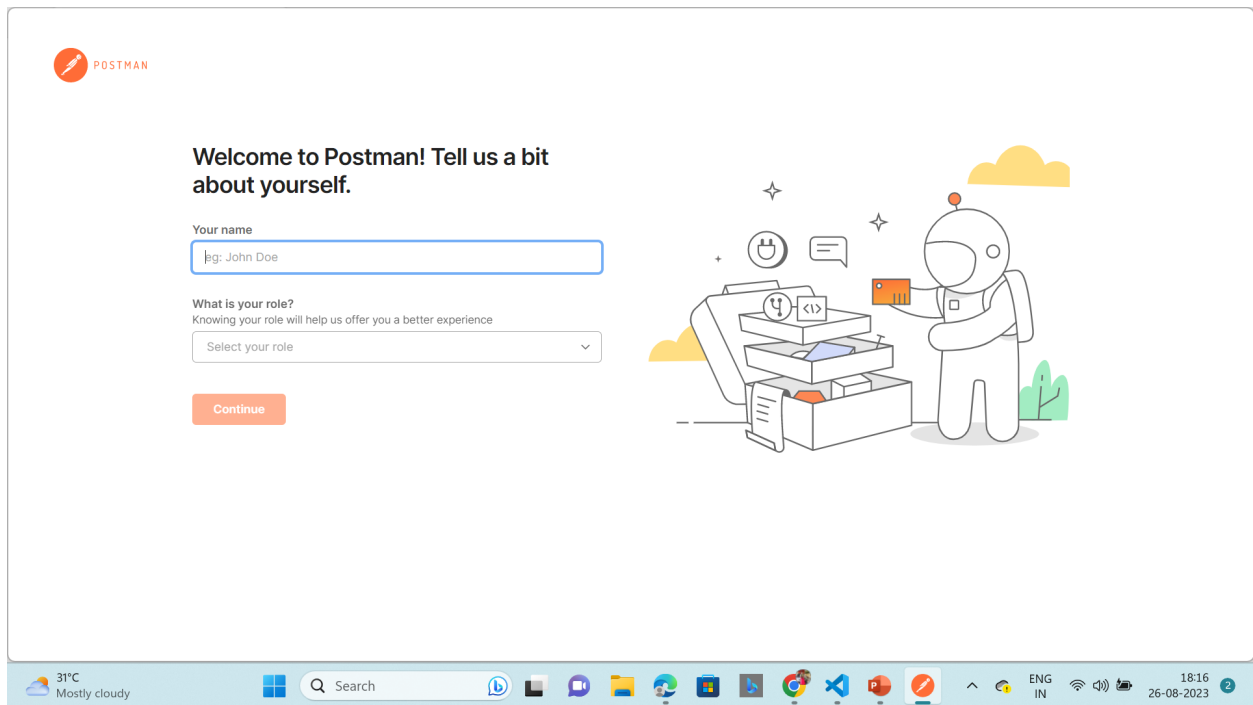

Step 6:

Now You Have to enter the Authorization token to sign In into your Account.

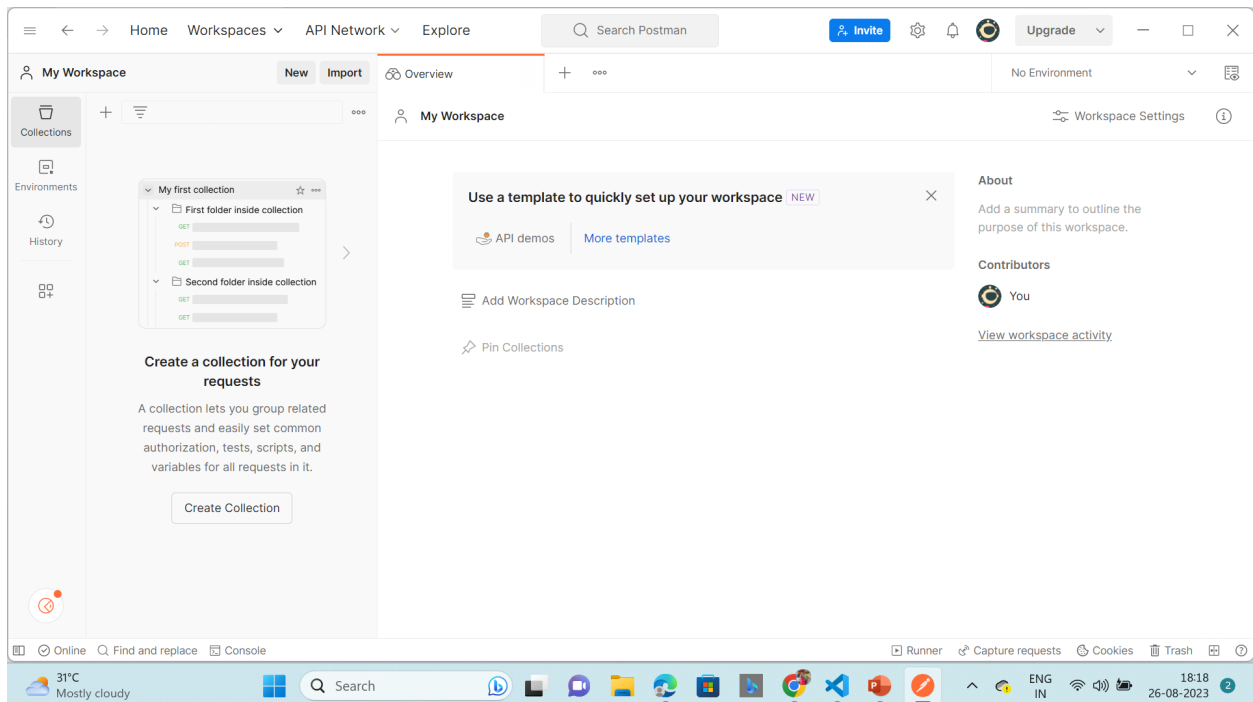

Step 7:

After signing in, select the workspace tools as per your requirement, and then click on, continue to get the startup screen.

Step 8:

You will see the following page, and then you are ready to use Postman.

Step 9:

The screenshot displays the Postman web application interface. The top navigation bar includes links for Home, Workspaces, API Network, and Explore, along with a search bar and an Upgrade button. The left sidebar features a 'Postman works best with teams' section with a 'Create Team' button, and a list of navigation items: Workspaces, Private API Network, API Governance, API Security, Integrations, and Reports. The main content area is titled 'Recently visited workspaces' and shows 'My Workspace'. Below this, the 'Explore popular APIs' section lists three APIs: PagerDuty API, Get Started Fast with Zoom APIs, and Speechace API. Each API entry includes a brief description, the creator, the update date, and statistics for Forks, Watch, and a third metric.

Postman works best with teams
Collaborate in real-time and establish a single source of truth for all API workflows.
